

HELPING HEALTHCARE
PROFESSIONALS
IMPROVE THE LIVES OF
CANCER PATIENTS.

OUR MISSION

Cancer Survivorship Training (CST) is an eLearning solutions company that delivers online continuing education courses and an online community for healthcare professionals. Our goal is to provide education and resources that increase users' knowledge and understanding of cancer survivorship care in order to:

- Improve outcomes
- Lower health-related costs

ORGANIZATIONS

Today there are more than 13 million cancer patients in the United States. This number is projected to grow to 18 million by 2020. Cancer care centers, hospitals and clinics are struggling to keep up with patient needs. The time is now to develop and implement survivorship care.

Unfortunately, the delivery of survivorship care is limited. A recent national assessment of oncology nurses found that:

- Only 13 percent of cancer-care facilities had a formal survivorship program
- Approximately 30 percent of cancer-care facilities had limited access to survivorship care

Cancer Survivors require patient-centered, coordinated care that is focused on improved outcomes and reduced healthcare costs. CST's solutions help organizations fill knowledge gaps and more efficiently improve access to care for cancer patients.

HEALTHCARE PROFESSIONALS

There are only a limited number of healthcare professionals in the United States trained to assist cancer patients. The numbers speak for themselves:

- There are two million nurses, but only 36,000 are members of the Oncology Nursing Society.
- There are 900,000 doctors, but only 11,000 are focused on oncology.

Given the number of cancer survivors, all healthcare providers need to be involved in the delivery of cancer survivorship care. But, most primary care providers (PCPs) need more education and access to survivorship training. This is a major reason why many cancer survivors choose to stay with their oncologists for their long-term healthcare needs.

CST courses help all healthcare professionals address their continuing education needs. CST solutions also create a common learning environment that will facilitate communication and collaboration among all healthcare professionals to deliver coordinated, patient-centered survivorship care.

COMMUNITY

CST's courses help healthcare professionals obtain the knowledge and continuing education they need. Additionally, CST facilitates continuous learning and enables collaboration through an online community for healthcare professionals.

The CST online community will provide a platform for healthcare professionals to share experiences, debate ideas, collaborate, develop research initiatives and provide support to each other. The design will include various groups and tools. The community will also have the flexibility to create groups and discussion topics.

COURSES

Cancer Survivorship Training (CST) provides online and mobile continuing education designed to give healthcare professionals evidenced-based training in survivorship care. Each course is developed in collaboration with medical content matter experts and provides the information needed to address the primary issues associated with cancer survivorship.

- Survivorship Care: Who, What, When, Where, Why and How
- Patient Navigation and Adherence
- Physical Late and Long-term Effects of Cancer and Its Treatment
- Psychosocial Issues and Cancer
- Energy Balance (Diet and Exercise)
- Economic Well-being, Employment and Cancer
- Complementary and Alternative Therapies
- Fatigue and Cognitive Difficulties
- Sexual Health
- Fertility Preservation
- Genetic Issues for Cancer Patients and Family Members
- Screening for New or Recurrent Cancer, Cancer Prevention and Control, and the Role of Primary Care in Cancer Survivorship Care
- Adult Survivors of Childhood Cancers
- Survivorship Program Development, Implementation and Sustainability

Dr. Jennifer R. Klemp, PhD, MPH Chief Executive Officer

Dr. Jennifer R. Klemp is responsible for the vision and overall leadership of Cancer Survivorship Training (CST). Dr. Klemp ensures the eLearning solutions CST creates address the needs of healthcare professionals aimed at improving the lives of cancer patients. In particular, Dr. Klemp oversees CST's course content and facilitates relationships with the oncology care community, healthcare training programs, and professional organizations.
